

Easy Bracket

Easy bracket is an approved component for making wood barriers on the edge of a flat roof or leading edge. They are easily fastened and are versatile when making an edge barrier on a parapet as the horizontal rails can be adjusted to suit the height of the parapet.

- Metal bracket for erecting a perimeter roof edge guardrail
- Fastens to leading edge of roof, parapet, perimeter, etc. Fastening holes in top and face
- Designed to use standard 2" x 4" lumber boards
- Ontario engineer approved to OH&S Reg. 213.91
- Powder coated safety yellow
