

## Beam Anchor

This lightweight beam anchor slides to close around an overhead I-beam 4"-14" wide. No tools required to fasten. Provides a temporary anchor for a retractable lifeline, or a lanyard or a vertical lifeline. Moveable and reusable. Approved and rated for fall arrest use to 5,000lbs.

- Quickly provides secure anchor point on I-beams
- Aluminum construction makes it light to carry
- Reusable. Fastens and releases without tools or drilling
- Fits horizontal I-beams with flanges 4" – 14" wide
- Suitable for retractable lifelines, vertical lifelines or lanyards
- Aluminum not affected by weld spatter

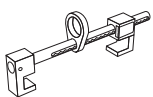

## Bolt Hole Anchor

Ideal for quickly installing an approved temporary anchor in steel. Uses a hole 3/4" to 1 1/4" diameter. Anchor fits through hole and pin releases to become a "T" behind steel. Installed and removed with one hand, no tools required.

- Removable anchor for steel
- Immediate installation without tools into holes 3/4" to 1 1/4"
- Use on horizontal or vertical I-beams
- 5,000lb rated for vertical or horizontal lifeline, retractables or lanyard
