

Ultra Safe 500 Mobile Anchor Point

The Ultra Safe 500 is an approved mobile anchor point giving fall arrest for one person on flat roofs. It only engages with the roof when there is a fall, and then the two anchor claws embed themselves into the roof and the weighted cart counterbalances the fall. Designed as a low weight, low cost alternative to existing carts on the market, it is fully engineered, tested and approved to Federal and Provincial regulations.

- Patented fall arrest anchor cart
- No roof penetration unless there is a fall
- Wheels along roof to place of work
- 100% tie-off when working along the edge of a roof
- Ideal for working on:
 - metal work
 - flashing
 - leading edge work
 - inspection and repair
 - when putting up or tearing down an edge barrier
- First man up, last man down
- Simple and quick set up. No tools required. Easy to understand
- Fast and easy to reposition to new working area:
 - a. Lower handle to release brake
 - b. Wheel along
 - c. Raise handle to lock brake
- Anchor claws only activate in the event of a fall
- Individual parts can be lifted by one person. Each of 10 x 44lbs weight has handle.
- Cart without weights weighs 60lbs so it can be lifted without need of heavy duty hoist
- Approved for fall arrest

Tested and approved on:

- Plywood deck
- 22 gauge 1 1/2" profile standard steel deck
- BUR & modified bituminous roof systems with insulation mechanically fastened to deck
- Not approved for use on bare concrete
- Fall arrest for one person to OHS regulations 213/91 and 628/05 (26)
- Paperwork supplied with anchor to show inspectors

New upgrades for 2010 model:

10" air tires - for easy movement on gravel

Steering - to make tight turns easier

Hoisting ring - to make lifting simple
