

## Versagrip Anchor

The aluminum VERSA-GRIP ANCHOR attaches without tools to an I-beam flange and serves as an anchor point for a wide variety of attachments including tie off points, horizontal lifelines and vertical lifelines.

Fast, easy, adjustable and reusable

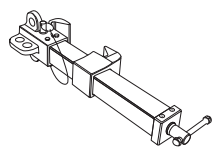

- Column attachment allows for elevated tie-off point, minimizing fall distances
- Can be mounted on a column, a beam top or bottom flange
- Fits flanges from 6" to 16" wide and from 3/8" to 1 1/4 " thick
- One man installation in under a minute
- Can be used in industrial construction, maintenance, industrial plants, bridges
- Temporary system
- 2 workers per system
- Cable reel adjustable from 1' to 30'

## Versagrip Reel Lifeline

This is a 3/8" diameter wire rope horizontal lifeline on a reel which fits into the Versagrip Anchor and is rated for two persons up to 310 lbs each including tools. Reusable and adjustable without tools up to 30ft length, it is quick to assemble by hand. The reel is wound by handle to achieve the lifeline length required, then locked with a 1/2" pin. The cable is not cut and the system is reusable. At the cable end is a latched hook which fastens to another Versagrip Anchor, or an approved anchor point.
